

Fenimore Landfill Daily Update

Thursday, August 15, 2013

DEP and its contractors are working 24/7 on the Fenimore Landfill to resolve the H2S odor problem.

Landfill Site Work

DEP has hired the contractor, Handex, to provide on-site testing, design, and construction of a gas ventilation system. Since Monday, testing of this system has taken place each day. To date DEP has completed testing on 3 of the most significant wells. Vent testing involves applying a vacuum to the existing gas vent to determine the total air flow and radial influence that a particular vent can produce. That information will be used to evaluate the effectiveness of the existing gas collection pits, which will help determine the design parameters for an alternative collection and treatment system.

Additional Monitors

DEP's air monitoring team conducted a reconnaissance of Roxbury Township today. The team is looking for a site(s) to locate additional H2S stationary air monitors.

A Look Ahead

Vent testing will continue on the remaining 6 wells.

Fenimore Call Center

DEP has established a call center to assist with resident questions. If you wish to file an **odor complaint**, please call 1-877-WARNDEP. This number is operational 24/7. If you wish to **ask questions** and not file an odor complaint, you can call DEP at (609) 341-2875. This number is operational during regular business hours 9 a.m. - 5 p.m., Monday through Friday. On weekends and evenings, residents can leave a message and we will return the call the next business day. If you wish to email your questions, you can contact DEP at: [RoxburyTwpFenimore Questions@dep.state.nj.us](mailto:RoxburyTwpFenimoreQuestions@dep.state.nj.us).
