

Fenimore Landfill Update

Wednesday, September 25, 2013

Landfill Site Work

While awaiting delivery of the custom scrubber, DEP located and acquired a surplus industrial scrubber for the gas collection and treatment system. The interim scrubber is now onsite, and DEP and its contractor are assembling and erecting it. The surplus scrubber will take approximately one week to test to determine if it can become operational as an interim solution.

Additionally, an underground electrical conduit for power to the gas treatment equipment was installed.

Air Monitoring

The five H₂S air monitoring stations will continue to operate 24/7. The data is telemetered to DEP for review. In addition, the town's contractor, Emilcott, is developing a detailed plan that includes location of four more H₂S monitors and a schedule for their installation.

A Look Ahead

Site preparations continue for the custom scrubber, which is being fabricated offsite, including areas for temporary water storage (red tanks that were on site previously).

Work continues to bring water and electric utilities to the landfill for equipment operations. The natural gas line is already installed and pressure tested.

Fenimore Call Center

DEP has established a call center to assist with resident questions. If you wish to file an odor complaint, call 1-877-WARN-DEP, 24/7. If you wish to ask questions without filing an odor complaint, call DEP at (609) 341-2875 during regular business hours (9:00 a.m. – 5:00 p.m., Monday through Friday). On weekends and evenings and holidays, callers can leave a message and their call will be returned. Questions may also be emailed to RoxburyTwpFenimoreQuestions@dep.state.nj.us.
