

Fenimore Landfill Update

Thursday, September 26, 2013

Landfill Site Work

Assembly of the interim scrubber continues onsite in preparation for testing. An important piece of equipment that connects the oxidizer to the scrubber has been fabricated and delivered to the site for assembly. Site preparation work for the custom scrubber continues. Modifications have begun to the utility poles in the neighborhood to accommodate new electric service for the site. Off-site construction of the custom scrubber continues.

Air Monitoring

The five H₂S air monitoring stations will continue to operate 24/7. The data is telemetered to DEP for review. In addition, the town's contractor, Emilcott, is developing a detailed plan that includes location of four more H₂S monitors and a schedule for their installation.

A Look Ahead

Site preparations continue for the custom scrubber, which is being fabricated offsite, including establishing areas for temporary water storage (red tanks that were on site previously).

Work continues to bring water and electric utilities to the landfill for equipment operations.

Fenimore Call Center

DEP has established a call center to assist with resident questions. If you wish to file an odor complaint, call 1-877-WARN-DEP, 24/7. If you wish to ask questions without filing an odor complaint, call DEP at (609) 341-2875 during regular business hours (9:00 a.m. – 5:00 p.m., Monday through Friday). On weekends and evenings and holidays, callers can leave a message and their call will be returned. Questions may also be emailed to RoxburyTwpFenimoreQuestions@dep.state.nj.us.
