

## **Fenimore Landfill Update**

Saturday, October 19 – Monday, October 21, 2013

### **Landfill Site Work**

DEP is operating the landfill gas treatment system using the interim scrubber during daylight hours. During all operations of the oxidizer, stringent protocols are being followed, highly trained personnel are present, and air monitoring is conducted.

Assembly of the custom scrubber continues. Duct work has been completed. The control panel for the custom scrubber arrived on Saturday, and it is being installed and wired. All pieces of the custom scrubber system are now in place, and it is being connected and wired.

Maintenance reapplication of Posi-Shell® continued.

Work to connect utilities is ongoing.

### **Air Monitoring**

The five H<sub>2</sub>S air monitoring stations continue to operate 24/7. The data is telemetered to DEP for review. The town's contractor, Emilcott, is developing a detailed plan that includes location of four more H<sub>2</sub>S monitors and a schedule for their installation.

The three SO<sub>2</sub> monitors that were set up in "mini-shelters" at the Vanover Well House, Lazarus Pump House, and Ledgewood Pond all recorded background conditions prior to operation of the oxidizer with the interim scrubber and continue to provide real-time data to DEP during testing. Until technical issues can be resolved to provide real-time public access to data, DEP will provide summaries of results. To date all SO<sub>2</sub> levels have been well within air quality standards. See attached SO<sub>2</sub> data.

### **A Look Ahead**

DEP will continue to operate the oxidizer with the interim scrubber during daylight hours. There will likely be visible water vapor (steam) coming from the interim scrubber.

DEP will continue to connect and wire the custom scrubber system and control panel.

For all necessary truck traffic to the site, DEP will continue to work with local officials to ensure that safe traffic controls are in place, utilizing the truck route.

Work continues to bring water and electric utilities to the landfill for equipment operations. Water is scheduled to be connected to the site next week, which will require one lane of Mountain Road to be closed while the work is taking place. The one-lane closure is planned to begin Wednesday and is expected to last three days.

### **Fenimore Call Center**

DEP has established a call center to assist with resident questions. If you wish to file an odor complaint, call 1-877-WARN-DEP, 24/7. If you wish to ask questions without filing an odor complaint, call DEP at (609) 341-2875 during regular business hours (9:00 a.m. – 5:00 p.m., Monday through Friday). On weekends and evenings and holidays, callers can leave a message and their call will be returned. Questions may also be emailed to [RoxburyTwpFenimoreQuestions@dep.state.nj.us](mailto:RoxburyTwpFenimoreQuestions@dep.state.nj.us).
