

## **Fenimore Landfill Update**

Tuesday, January 7, 2014

### **Landfill Site Work**

At approximately 8 a.m. on Tuesday, January 7, the treatment system automatically shut down due to a mechanical issue that may be weather-related. The contractor, Handex was not able to make the repairs due to the severe weather and the risk of damaging the system. The system currently is shut down and has been drained of all fluids to prevent any impacts from the severe cold.

Once the threat of freezing damage is controlled, repairs to the system will resume. The system will not operate for the rest of today and is expected to be offline on Wednesday. DEP expects the repairs to take at least a full day to complete due to the severe weather.

DEP does not anticipate odors from the site during this shutdown.

### **Air Monitoring**

The nine H<sub>2</sub>S and three SO<sub>2</sub> air monitoring stations continue to operate 24/7. To date, all SO<sub>2</sub> levels have been well within air quality standards. Live data for both the H<sub>2</sub>S and the SO<sub>2</sub> monitors is available at <http://54.235.249.118/guests/greenlight.get.live.data.2a.php>.

### **A Look Ahead**

Limited truck traffic is needed to supply materials to the site. In addition, wastewater from the scrubbers will be trucked off the site periodically. For all necessary truck traffic, DEP will continue to work with local officials to ensure that safe traffic controls are in place utilizing the truck route.
